NAPCO	iBridge	Free	iPad and Android	✓	✓	✓	✓	Yes, any cell phone with browser	NAPCO GEMINI Series, all models	Requires NAPCO security control panel and NAPCO iRemote-MOD IP module	✓	✓	✓	✓		✓	✓	✓	✓	✓	✓		The iBridge mobile app provides complete control of the system, including: Control of the security system, Viewing of iSeeVideo cameras, Enrollment, configuration and control of the Z-Wave devices.**** These mobile apps have the same GUI as the iBridge Touchscreen keypad, so there will be no additional learning curve for customers who also have the touchscreen installed.
Time Warner Cable	IntelligentHome	Free (must be IntelligentHome subscriber)	iPad	✓	✓	✓		Yes, any cell phone with browser			✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓		

* Cost is only the price of the app itself. It does not list any license fees or subscription fees. Check with the provider, as some may have license charges for each device or system location.
 ** Control 4's app licenses are universal. If a user buys a MyHome device license for an iPhone, and later decides to switch to an Android, it is fully supported. And if the user buys a site license, they can use any number and combination of iOS or Android phones or tablets. Further, MyHome app runs on PCs and Macs. MyHome License (any device, transferable, perpetual: iPhone, iPad, Android) \$199 for single device \$499 for site (any number of devices) 4Sight License \$99/year
 *** HAI's app price has no monthly fees and/or a "license" charge for each device, and/or a "license" charge for each system location. When buying an HAI app, the \$49.00 fee will be the only expense for remote access to your home, business, and vacation home, on as many devices as is required.

**** The Z-Wave portion of the iBridge app allows the enrollment of the Z-Wave devices and the creation of scenes that will enable panel activity to trigger Z-Wave devices. Typically, Z-Wave device configuration must take place in front of the system keypad; however, iBridge allows enrollment and configuration right on the mobile device or on the iBridge website. This becomes a great feature for the dealer when he must help configure the Z-Wave devices for the customer and can help remotely either on-line or using his mobile app, negating the need for a service call.
